BUSINESS HOURS

Weekdays 7:30 a.m. to 12 noon; 1:00 p.m. to 5:00 p.m.

Saturdays, 7:30 a. m. to noon

CLOSED ON SUNDAYS AND HOLIDAYS

SHIPMENTS, PICK-UPS AND DELIVERIES

Shipments travel at the risk and cost of the purchaser and will be forwarded rail or truck express. Requests for parcel post shipment must be accompanied by sufficient postage (usually 10% - balance will be refunded).

An extra 3% discount will be allowed on all orders called for that do not require special preparation and/or loading.

We caution those who pick up orders to use enclosed body truck or station wagon. If open rack truck is used, bring canvas or other suitable covering.

Orders placed in advance may be picked up during other than regular business hours upon arrangement.

See page 13 for delivery information.

We dislike intensely to disappoint anyone but may have to during the rush season if we do not know you are coming and you want to take stock with you. Please order well in advance if possible so that we may properly schedule our work and give better attention to your order.

CERTIFICATES OF INSPECTION

All shipments are accompanied by a certificate of inspection by the State of New Jersey Department of Agriculture.

Shipments leaving the Jap. Beetle Quarantine Area are accompanied by a certificate of inspection by the United States Department of Agriculture attesting the stock shipped to be free of infestation.

WHAT MAKES 'FINER LINERS' FINER?

What makes one plant better than another, or one child a leader and another a delinquent? Answer -- Tender loving care and a desire to do ones best.

FINER SELECTION: We continually strive to improve our variety of plants, to offer the best and hardiest of the new and the old. While we can't have everything, you may be assured that what we do offer has proven to be among the best plants for you to grow and prosper with.

QUALITY CONTROL: Here we start right at the top and keep at it right down to the soils that support the stock plants, of which we maintain thousands. Critical initial selection of propagating wood, painstaking preparation, the best of care, rejection of inferiors, expert stock picking and packing, careful labeling, all are common policy with us. We aim to put in your hands stock that you as buyer and we as producer & seller can be proud of.

SERVICE: Your inquiries and orders receive prompt and efficient attention from the moment of receipt until you are satisfied. Orders, for instance, are immediately checked against accurate inventories, booked & acknowledged. Shipments fit your schedule as stock becomes available. You receive notice of all shipments. Permanent records are kept for your use. Good service requires criticism and we sincerely invite yours and your suggestions.

ROYAL STAR MAGNOLIA

(Magnolia stellata "Royal Star")

ACCLAIMED BY PLANTSMEN HERE AND ABROAD

- ★ ROYAL STAR has large, pure white, 25 to 30-petal blossoms that literally cover the plant in a galaxy of bloom.
- ★ ROYAL STAR is pleasantly fragrant.
- ★ ROYAL STAR blooms from a week to 10 days later than ordinary stellata, thereby reducing the disadvantages of blemished blossoms caused by spring frosts. It is very hardy (Zone 5a).
- ★ ROYAL STAR is a compact, robust plant with rich bright green foliage. It branches well and is a rapid grower.
- ★ Order liners, containers or B&B now from the schedule below. Feature ROYAL STAR in your early spring promotion.

CHOOSE

FINER LINERS

in JIFFY POTS

The clippings on the right are from Technical Bulletin No. 41 on Nursery Crops published by Jiffy-Pot Company of America, West Chicago, Illinois.

The bulletin was prepared after extensive research and a critical and searching look at just what Jiffy-Pots were accomplishing in the nursery industry.

Being pioneers in the use of Jiffy-Pots in propagation, we are pleased with their huge success. We can honestly report that they have been a major contributing factor in permitting us to uphold FINER LINER quality while at the same time, in spite of rising costs, keeping our prices at their current competitive level. IF for some items you pay a bit more FINER LINERS are worth every cent of it.

BUY CHEAP -- PREPARE TO WEEP
BUY BEST -- FILL MONEY CHEST

buying time ✓

"Buying on time" is often discussed these days with many advocates, both for and against the practice. If it were possible to "buy time" itself, we are sure there would be only one side to the question. "Time" is the one commodity that is almost priceless.

And yet "time" in one sense can be bought by the nurseryman—time needed in the production of nursery plants to bring them to a salable size. We are referring, of course, to the time saved in the early growing stages through the use of Jiffy-Pots for seedlings and cuttings. Most nursery stock is sold in the fall, there

their liners in Jiffy-Pots.

Why can you save an entire growing season when the plants are handled in Jiffies? Because of the rapid, continuous growth that takes place. Rooted cuttings and seedlings seem to take hold more quickly, make roots more rapidly, grow more quickly. But most important of all, there is no transplant shock. The pot never needs to be removed from the plant, as the roots grow right through the peat walls. When a plant is knocked out of a clay pot, or removed from a plant band, the soil ball is apt to be broken in the knocking out, or in the planting, or in shipping. In the Jiffy-Pot the whole pot ball is there, undisturbed. Plants in Jiffy-Pots never stop growing

only-rotted on March 22, 1941 and field May 21."

Another important point, to quote Mr. Radder again: "With Jiffy-Pots, transplanting is no more a problem since you can do it all year round, not just in April and May. In spring we are so busy shipping that transplanting must be rushed, and that is when losses get heavy. Then cheap items become expensive. In Jiffy-Pots we can line them out when we have nothing else to do."

reducing losses

The rate of loss in Jiffy-Potted plants is rather remarkable. This is apparently due to the favorable growing environment in the pots—unrestricted root growth, good aeration, even distribution of moisture. Charles Kempenaar, Boulevard Nursery, Newport, R.I., says: "We can pot 100,000 plants in Jiffies, grow them on for several months, then line them out in the field with virtually no loss—not over 40 or 50 plants out of 100,000. We believe there is no other way as effective in propagating nursery stock."

the particular winter.

the following summer 61% of the bare root plants had died, whereas only 9% of the Jiffy-Potted ones were lost.

The two main advantages to be gained by the use of Jiffy-Pots on tree seedlings and cuttings, is the high survival rate and the fact that you can plant them twelve months a year.

saving labor

The Oki Brothers of Sacramento Nursery in California are keen advocates of the use of Jiffy-Pots in their gallon can production. Plants go from propagating bench right into 2¼" Jiffy-Pots. After satisfactory growth is made, they are planted "pot and all" into gallon cans in a large semi-automatic transplanting and can-handling machine which has been developed for this purpose. Having thoroughly tested a number of other types of containers, they now use Jiffy-Pots exclusively—one million pots per year.

as expensive operations

as washing and sterilizing.

William Flemer, III, of Princeton Nurseries of Princeton, New Jersey, reports: "Our planting crew would hate to think of going back to clay pots after having used Jiffy-Pots for several years. This past spring a truck load of plants came out to the

Shipping. Jiffy-Potted liners ship very well in corrugated cartons, as the pot provides a reservoir of moisture that carries the plant along nicely if delays in delivery are encountered. The Ver... devised a rather

FINER LINERS IN JIFFY-POTS

Top-quality liners in light weight peat moss pots. Grown, sold and shipped direct from us to you in lightweight veneer trays that can easily be carried right to your planting site or held (plants keep right on growing) until you are ready. No problems, no high shipping costs and NO PACKING CHARGES. Take them when you want them but order now to be sure. 3% discount for pick-up, 2% for cash. Deliveries with our special van at low cost, see page 12 for details. Satisfaction guaranteed. Use convenient order blank in center.

HEAVILY ROOTED CUTTINGS

Our rooted cuttings are always a good buy. They're true-to-name and very well rooted. Only strong healthy cuttings are selected initially. These are then graded for uniformity. All weak tips are discarded. For better stands, faster growth and more profits use FINER LINER ROOTED CUTTINGS.

SEED — SEEDLINGS — TRANSPLANTS

SPECIES AND HYBRIDS—AZALEA, LEUCOTHOE, PIERIS, RHODODENDRON

Azalea mollis

Azalea poukhanensis

Azalea mucronulata

Rhododendron Hybrids

Leucothoe catesbaei

STARTED SEEDLINGS are available throughout the year as the supply lasts. Sowing is done during the winter and the size of the seedlings will vary with the species or clone and the age, those pictured above being about 6 months. The quantity per flat will likewise vary between 300 and 600 during the first 6 months or so after which some of the smaller seedlings may smother. Cultural suggestions are furnished with each order. Half flats may be purchased for 60% of the appropriate full flat price.

DISCOUNTS: 10 flats, deduct 5%; 25 flats, deduct 10%. 2 half flats equal 1 whole.

TRANSPLANTS are offered in flats and in 2½" and 3" peat-moss pots. They are healthy sturdy little plants with well developed root systems. The 3" pots are mostly twice transplanted. Less than full trays of potted items may be purchased in lots of 12 2½" pots or 8 3" pots for 50% of the full tray price.

DISCOUNTS: 15 full trays or flats or equivalent—deduct 5%, 30-10% and 100-15%

NOTE: Seedlings of hybrid clones do not present plants of character identical to the parent from which seed was picked and must not be named thereafter. A large enough percentage should, however, be of equal or better character as to make planting both profitable and interesting. Cultivar names and descriptions are used here for genetical interest only.

SEED — SEEDLINGS — TRANSPLANTS

SPECIES AND HYBRIDS—AZALEA, LEUCOTHOE, PIERIS, RHODODENDRON

Pertinent information regarding these seed, seedlings, and transplants is set forth on page 8. The continually increasing interest in and demand for our seedlings & transplants speaks well for both their quality and good financial returns evident from crops produced with them.

PLEASE NOTE: Seedlings of hybrid clones do not present plants of character identical to the parent from which seed was picked & must not be named thereafter. A large enough percentage should, however, be of equal or better character as to make planting both profitable and interesting. Cultivar names and descriptions are used here for genetical interest only.

DISCOUNTS: Please see page 8 for quantity discounts.

TERMS AND CONDITIONS OF SALE

PRICES quoted herein cancel all those previously printed and are subject to change without notice.

TERMS to those with established credit are 2%, 10, net 30 days from date of shipment or invoice which ever is later. All others are requested to send payment in full prior to shipment or remit upon delivery or pick-up.

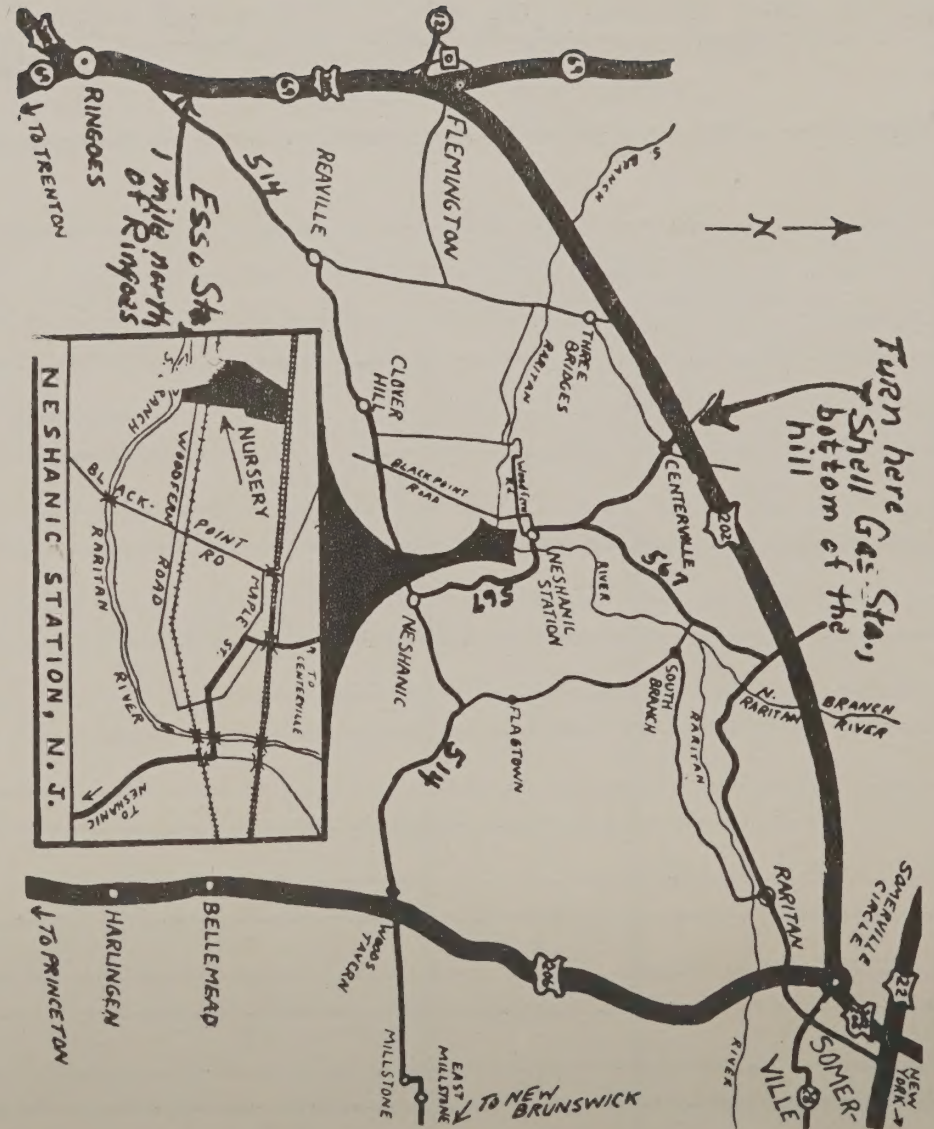

All orders picked up at the nursery will be permitted a discount of 3% from the net amount of the order. Special materials for loading will be supplied at cost.

To defray costs of carrying accounts beyond the stipulated term period we must charge such accounts at the rate of 1% per month on all overdue balances.

CLAIMS for error or count must be made in writing within 10 days of receipt of shipment. Inspect damaged or overdue containers at time of receipt and obtain report from or initiate claim to the express agent. We cannot be responsible for any damage due to mishandling or delay enroute but offer every assistance in making claim to the forwarder. If you have a complaint, please let us hear from you. We want satisfied steady customers.

GUARANTEE: We, John Vermeulen & Son, Inc., warrant to the extent of the purchase price that the nursery stock sold is true-to-name and as described within recognized tolerances. We give no other or further warranty, expressed or implied, and will under no circumstances be liable for more than the invoice value at the time of purchase.

NOTICE: All stock is offered subject to prior sale. Orders will be accepted in order of receipt

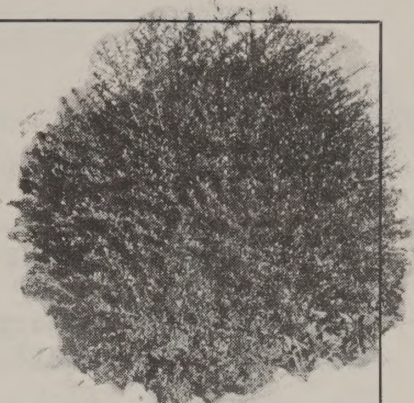

NEW

ILEX CRENATA 'GLORY'

NEW COMPACT JAPANESE HOLLY.

Truly a glorious holly that has passed all tests with honors. The short bunchy, free branching growth make it an excellent compact. The small leaves are dark green and glossy. All these combine to give 'GLORY' an unusual attractiveness.

2 1/4" Jiffy-pots, 36 per tray @ \$10.80, 15 up @ \$10.26, 30 up @ \$9.72
3" Jiffy-pots, 25 per tray @ \$12.50 15 up @ \$11.87
5" 1 Quart Poly pots, 6-10", 5 up @ \$1.25, 10 up @ \$1.05, 25 up @ 90c, 100 up @ 75c

HYBRID RHODODENDRON

HARDY, STRONG, OWN ROOT TRANSPLANTS

YOU WILL BE REAL PLEASED WITH THE EXCELLENT QUALITY OF THESE RHODODENDRON TRANSPLANTS AND EVEN MORE SO WITH THEIR PERFORMANCE. EACH PLANT IS WELL ESTABLISHED, WITH PLENTY OF THEIR OWN ROOTS, IN A GOOD MIX OF PEAT-MOSS AND SOIL. EACH WILL HAVE PUT ON AT LEAST ONE NATURAL GROWTH AFTER IT WAS TRANSPLANTED. THESE ARE NOT DORMANT CUTTINGS. ALL VARIETIES WILL BE AVAILABLE ABOUT MID TO LATE MAY, OR AFTER IF YOU PREFER. PLACE YOUR ORDERS NOW HOWEVER TO AVOID DISAPPOINTMENT LATER.

REGARDING QUANTITIES & PRICES: If varieties are mixed within quantity rates, add 20%. Example:- 5 America @ 1.20, 5 Cataw. album @ 1.05, 10 Charles Bagley @ 1.05, 5 Lee's Dark Purple @ 1.20 - Total \$27.75 plus 20% or \$5.55 - grand total \$33.30 for the 25 plants. Please do not order fewer than a total of 5 plants of any one variety or 5 plants at the "each" rate.

SPECIAL: - One of each variety (19 plants) - shipping charges included - \$24.85

CONNOISSEUR'S COLLECTION

IDEAL FOR GARDEN CLUBS. ALSO AS GIFTS FOR YOUR BEST FRIENDS AND CUSTOMERS. FOR YOUR TRIAL & PLEASURE WE OFFER ONE LABELED, JIFFY-POTTED PLANT OF EACH. EXPERT PACKING & SHIPPING INCLUDED - \$25, ANY 8 - \$10, LESS FOR QUANTITIES.

BUXUS 'VARDAR VALLEY', New very hardy boxwood from Arnold Arboretum

DAPHNE 'BURKWOODI', Fragrant, pink, compact bush

FRANKLINIA ALATAMAHA, Fall blooming tree

ILEX AQUIPERNYI 'BRILLIANT', Attractive holly hybrid. Bright red fruits

* ILEX CRENATA 'FLUSHING', Very hardy selection, upright, large leaves

* ILEX CRENATA 'GLORY', New, hardy, compact, low, dark green

* ILEX CRENATA 'GREEN THUMB', Very hardy, low, compact, bright green

* ILEX OPACA 'PYRAMIDALIS', Compact pyramid, good fruiter, very hardy

* ILEX OPACA 'SPLENDORBERRY', Large robust plant, large bright fruits

LEUCOTHOE AXILLARIS, Lower, more graceful, lighter, brighter color

LEUCOTHOE CAT. 'TRIVAR', Variegated Leucothoe

* MAGNOLIA 'ROYAL STAR', Large pure white, later than stellata, good habit

* MAGNOLIA STEL. 'WATERLILY', Pink buds, pink-tipped petals, fragrant

METASEQUOIA GLYPTOSTROBOIDES, Dawn Redwood. The new "old" tree

* PIERIS JAPONICA 'COMPACT', Low compact andromeda with attractive foliage

PIERIS JAPONICA 'PINK BUD', Pink buds, flowers open blush pink to white

PIERIS JAPONICA 'DOROTHY WYCKOFF', Newest and best of the pink forms

* PYRACANTHA COCCINEA 'LOWBOY', Like lalandi but much lower and compact

SARCOCOCCA HOOKERIANA HUMILIS, Attractive evergreen groundcover, fragrant

* TAXUS CUSPIDATA 'VERMEULEN', Dense compact broad pyramid, good for hedges

* TAXUS MEDIA 'KELSEYI', Large dark needles, heavy fruiter, broad glove type

* TAXUS MEDIA VERTICALS, Tall, slender, hardy. Very attractive & useful

FLUSHING, GRANDIFOLIA, PILARIS, PYRAMIDALIS, ROBUSTA, SENTINALIS,

STRICTA AND VIRIDIS. These are described on page 15

BONSAI: MINIATURE TREES

MINIATURE TREES, treasured for generations in the Orient, can now be grown by gardeners everywhere.

The Japanese, who have made a fine art of these miniature trees, call them bonsai. And in Japanese homes, gardens, and nurseries bonsai, often a century or two old, are prized potted plants. In our own homes and gardens bonsai bring a new and different decorative note—the glamor and mystery of the Orient.

Bonsai culture is not difficult once the age-old techniques are understood, and the tiny trees are surprisingly hardy and easily grown. Plants for bonsai may be found in our own gardens and nurseries; there is no need to import seeds, plants, or other materials. Actually bonsai require little time or space, and no glass or expensive equipment.

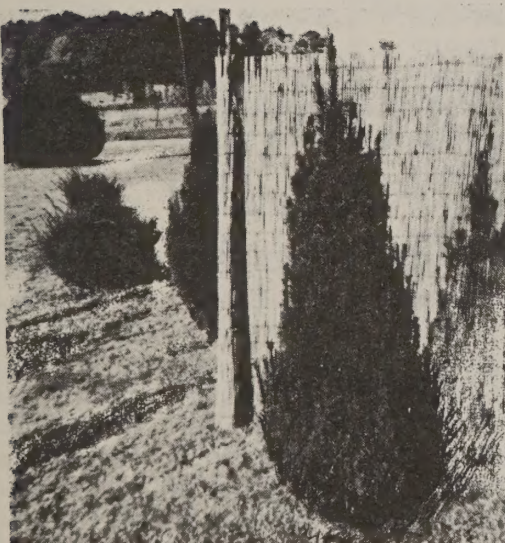

Our potted **FINER LINERS** are ideally suited to Bonsai culture. We have been receiving numerous requests for them and also for recommendations. As an assist to those interested in Bonsai we have indicated with a "B" the items in this catalog which we consider best suited for Bonsai. There are many other fine plants of course. With but a few exceptions you will not find each prices on **FINER LINERS**. However we will be pleased to quote on and make selection of a small or large quantity of assorted plants. Just send us your list of items wanted and state the quantities of each. We can also start Bonsai and will be pleased to discuss this with you.

BONSAI, MINIATURE TREES by Claude Chidamian. Illustrated. \$4.20 postpaid.

Tall & Slender Hardy Yews

EXCELLENT FOR HEDGES, BEAUTIFUL LIVING WALLS

IDEAL FOR SPECIMEN, PLANTER OR FOUNDATION

One of the specimens in our **Taxus** display

FLUSHING—has large, sturdy, rich dark green foliage and bright red berries. Maximum width about 18 ins.

GRANDIFOLIA—is a sturdy, compact column with large, long, heavy, dark green foliage. Maximum width about 21 ins.

PILARIS—has gracefully curled foliage of medium-green color that is very attractive. Maximum width about 21 ins.

PYRAMIDALIS—is a rich showy, full-bushed pyramid with medium-green foliage and bright red berries. Maximum width about 24 ins.

ROBUSTA—forms a dense, compact column and has large sturdy dark green foliage. Maximum width about 21 ins.

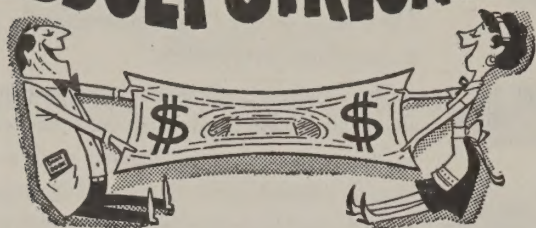

SENTINALIS—is the narrowest—a compact, slim sentinel of green with attractive curled foliage and bright red berries. Maximum width about 15 ins.

STRICTA—makes an ideal hedge—dense, compact, medium-green, sturdy with maximum width about 21 ins.

VIRIDIS—has year-round fresh green color and a twist in the foliage that makes it different. A real good plant. Maximum width about 18 ins.

YOU WILL FIND LINERS OF THESE FINE YEWS LISTED ON PAGES 5, 7 & 14.

SMALL LOTS AND SURPLUS

At very attractive bargain prices we offer a wide variety of small lots and surplus liners. Come see us on these--it'll be well worth your time.

WANT LISTS WANTED

We are often in a position to quote attractively stock not listed or in surplus. Just send us your requirements lists whenever they are ready.

DELIVERY SERVICE

When it is economical we will be glad to make deliveries directly to your nursery. Charges will be for costs only and may be figured by using the table below. When actual costs are less than the figured costs the charges will be decreased accordingly. You can save by pooling orders to one address. When orders are not of sufficient size to make delivery practical we will of course be glad to have the stock expertly packed by our packers for shipment via railway express or parcel post.

PLEASE GIVE COMPLETE DELIVERY DIRECTIONS. LACK OF THESE MAY DELAY DELIVERY. INCLUDE YOUR PHONE NUMBER AND INFORMATION (A SKETCH IF NECESSARY) AS TO WHEN AND WHERE DELIVERIES WILL BE ACCEPTED.

MINIMUM DELIVERY CHARGE \$3.75

GRADE KEY

BB - Balled & burlapped	HVY - Heavier or more bushy than No. 1 grade
BR - Sold bare root	P - Grown in clay pot. (Sold without pot.)
C - Grown from cuttings	PP - Grown in peat-moss pot. (Sold with pot.)
FLD - Grown in field rows	SB - Sold with soil ball
G - Grown from grafts	T - Each T indicates one transplanting
S - Grown from seed	LYR - Age in years, from time of propagation
R/C - Rooted cuttings	HnH - Hose in hose

STOCK FOR CONTAINERS

Conclusions drawn from growers experiences and research studies show that transplanted liners, especially potted liners, are best for canning. Practically any item we list can be grown on in containers. If you have had no previous experience, however, we suggest that you start with smaller quantities. There are certain cultural practices not common to growing in the field that you should become familiar with before growing container stock on a large scale. The popularity of container grown ornamentals is increasing rapidly. Growth of container grown plants often exceeds that of field grown plants. Cost of handling is considerably less than when plants are balled and burlapped and most generally a greater volume of material can be handled in a given period. This is a distinct asset in the hectic period of Spring and Fall sales. Since container grown plants can be moved at any time, selling can be accomplished throughout the year. Those who sell container grown plants report increased customer satisfaction, fewer complaints and fewer replacements.

Our **F**irst thought is quality.
Using **I**mproved practices throughout
our plants receive **N**ever ceasing care.
They therefore **E**xceed usual standards
and are completely **R**eliable, every one.

We assure **L**asting qualities in all stock
by active **I**nspection and supervision.
Finer Liners are **N**utritionally sound, not forced
Our packers insist on **E**xpert wrapping and packing
so that plants arrive **R**ich in vitality.
Our goal - complete **S**atisfaction in every respect.
